

Soaring to success

## Computing Enrichment

At Kentmere Academy, we are proud to hold Computing based enrichment opportunities. For example, we have Animation and Coding after school clubs. The children enhance their in-school learning by building on the skills taught and completing projects.

We are proud to have Digital Leaders who have worked with the local Arch Alliance to form their role as a Digital Leader. They have taken part in many extracurricular opportunities to further develop their roles; we have been on trips to the Apple Store to learn about iMovie and had a memorable day exploring different technologies, with other Digital Leaders from the borough.

We actively take part in national, annual Safer Internet Days informing both parents and Governors of our plans.

In Year 5/6 the children take a trip to 'Eureka' as part of their Computing based topic, there they explore digital exhibitions and learn about the latest interactive technology from around the world.
