

Subject Information

Computing Early Years

In the Early Years Foundation Stage, Computing is taught across the Early Years Framework and as part of provision. The children have access to laptops, Chromebooks and iPads where they use different apps and software to enhance their learning.

The children in EYFS learn about what technology is and what simple programs can do, and use these programs to create simple outcomes.

In EYFS the children will learn:

- That an action happens when a button is pressed/knob is turned
- That information can be found on a computer
- Where to find different technology
- To use a simple drawing program
- To use different apps to create shapes and write letters
- To interact with age-appropriate computer software.
